

# ArmorIQ Tracks

**Resources** :- If you choose ArmorClaw use [claw.armoriq.ai](https://docs-armorclaw.armoriq.ai/docs) and refer <https://docs-openclaw.armoriq.ai/docs>

If you choose ArmorIQ SDK use [platform.armoriq.ai](https://docs-armoriq.ai/docs) and refer <https://docs.armoriq.ai/docs>

## Track 1: Secure by Default

### About This Track-

Build any tool, workflow, or product that helps developers, teams, or businesses catch and fix security issues before they ship — making security invisible and automatic.

### Track Requirements

You must use **either**:

- ArmorClaw — our open-source security claw that you can integrate into your pipelines and workflows
- ArmorIQ SDKs (TypeScript and/or Python) — to connect your solution to the ArmorIQ platform for policy enforcement, intent verification, and audit logging

---

## Track 2: AI Agent for the Real World

### About This Track-

Build an intelligent AI agent that solves a real-world problem — monitoring, compliance, incident response, onboarding, or anything else — and show how AI can make security accessible to non-experts.

### Track Requirements

You must use **either**:

- ArmorIQ SDKs (TypeScript and/or Python) — your agent must integrate with ArmorIQ for policy-gated tool execution, delegation workflows, or audit logging
- ArmorClaw — to add security scanning or enforcement capabilities to your agent's toolset

---

## Track 3: Open Category — Reimagine Security

### About This Track-

Use ArmorClaw and the ArmorIQ platform however you want — build something that makes the internet safer, smarter, or easier to trust. If it's creative and impactful, we want to see it.

### Track Requirements

You must use **either**:

- ArmorClaw and/or ArmorIQ SDKs (TypeScript / Python) — your project must integrate with at least one of these to qualify
- The ArmorIQ platform — for policy management, enforcement, or any other capability it offers

### Get Started

- Head to [platform.armoriq.ai](https://platform.armoriq.ai) to create your account, explore the dashboard, register agents, configure policies, and grab your API keys
- Read the SDK docs and integration guides at [docs.armoriq.ai](https://docs.armoriq.ai)
- Watch the walkthrough video for a step-by-step guide on how to use ArmorClaw and ArmorIQ together from SDK init to policy enforcement to audit logs
